

Waterless Urinal SYSTEMS

Service Technicians for all urinal systems

Suppliers of all brands of Waterless urinals

We fix Smelly, water wasting Urinals - "Guaranteed"

Waterless Urinal Cubes & Cleaner

Bacteria Based Cubes and Cleaners:

Gone are the days when you had only one choice when it came to purchasing bacteria based cubes and cleaner for your waterless urinals and troughs. There are now a number of choices you have depending on your bathroom situation and your budget.

Waterless Urinal Systems is a provider of many different types and brands of bacteria based cubes and cleaner. This allows us to be the market leaders in bacterial cubes as we are not tied to one supplier. We have the ability to adapt to new technologies in bacterial products allowing us to pass directly onto you the customer.

If your customers or employees are complaining of offensive odours coming from the mens bathrooms, simply give us a call or shoot us an email. We are sure to have the remedy - Guaranteed!

Urinal Servicing

Some of the problems with urinals:

- * Emitting offensive odours that just don't seem to go away no matter how hard you clean.
- * Constant flushing causing high water usage.
- * Not enough flushing.
- * Constant blocked drains.

All urinals needs servicing. Body salts, uric acid, hair, other minerals and foreign debris end up sitting in the s-trap of the drain. If not removed it will eventually block the drain. The other problem is that all this debris in the drain starts to emit offensive odours.

Waterless Urinal Systems uses all natural products and high pressure water technology to remove the uric acid and foreign debris from the drainage system, urinal surface, step, tiles and drain covers effectively removing the odours emitted from the urinal.

Other issues that we can fix are:

- * **Constantly flushing urinals** - We can monitor and adjust automatic flush sensors to reduce flushing times and frequency.
- * **Not enough flushing** - Sometimes automatic sensors and valves fail. Valves have a life span and need to be replaced. They suffer from a build up of scale and dirt and eventually stop working properly.

Waterless Urinal Systems can repair or replace these for you.

Before

After

Waterless Urinal Systems can also provide you with your consumable items for any type or brand urinal.

Retrofit your existing flushing urinals to make them waterless

Want to save massive amounts of water (and money)?

Waterless urinal Systems can adapt your current urinals to make them waterless.

Here are some details: (contact us for more info)

aqua SLEEVE

The Aqua Sleeve waterless urinal system is an environmental product that retrofits to existing urinals.

The sleeve (1 way valve) works by allowing water and urine to flow through it and not allowing smells to come back into the bathroom.

The AquaSleeve has a biological block inside that is slowly released into the drain to combat bad bacteria which causes smelling.

A flush timer is installed to supply a measured amount of water into the urinal to keep it clean.

Updating your mens bathrooms?

We are a supplier of waterless urinals.

aqua LOK

Barrier for waterless urinals

On-line ordering: www.aqualok.com.au

Aqualok is a oil based barrier designed to be used in waterless urinals that have a cartridge design system.

The oil is simply poured into the urinal after the trap cover is in place eliminating odours from the urinal.

Aqualok is replaced every 3months or whenever the urinal trap is cleaned.

Aquaclean microbial cleaner should also be used for daily cleaning. Aquaclean is designed to be used with Aqualok.

Aqualok can also be used in floor wastes to prevent odours from coming out of the drain due to stagnant water.

Aqualok is manufactured in Australia.

aqua Valve

Smell stopper for floor wastes.

AquaValve is used to stop odours and vermon from entering the washroom via the floor wastes (Drains).

The valves is attached to the drain cover and will allow water to enter the drain but will not allow any back flow.

AquaValve is Watermark Approved

AquaValve is Easily retrofitted

AquaValve Fits majority of floor drains
