***“What an
amazing
group of
Northern
Rivers stars
– this is a
must attend
session”***

Stuart Anderson
Bee Inventive-Flow Hive

Flow Hive has revolutionised beekeeping by allowing for honey to be extracted directly from a beehive, as opposed to having to open the hive and disturb the bees. The father and son team of Stuart and Cedar Anderson made history when they reached their crowdfunding goal of \$70,000 in just 10 minutes, going on to raise \$17.25 million during their campaign for this game changing Northern Rivers invention.

Stuart Larsson
Mara Seeds

Mara Seeds is a leading name in Australia's organics industry – with their trailblazing approach to sustainable agriculture bringing organic seeds, beef, soybeans, fertiliser and compost produced on farm to the domestic market. The Larsson family farm sits on country protected from cyclones, with rolling hills taking care of drainage and rainfall for watering but it's the soil Stuart says he always comes back to.

Ross Roberts
Harwood Marine

Harwood Marine is a state of the art shipyard with a global customer reach. In recent years they've built an 80 metre long, 3,000 tonne cargo and passenger ship for a French company, a 47 metre ferry for a Dutch group and two passenger ferries for Captain Cook Ferries for use on Sydney Harbour. With a recent investment of \$10million they have increased their capacity and retained their workforce during tough times.

Adam Grabowski
Flo Gardens

Flo Gardens is the world's first self-cleaning aquaponics system – a self-sustainable domestic system that grows seafood and plants together while using 90% less water than soil gardens. Founders Adam Grabowski and Zerina Millard have designed and constructed a backyard ecosystem to make food sustainability more accessible for the average domestic household. Flo Gardens is currently in the prototype stage.
