

*Nestled in the foothills of the beautiful Border Ranges, our Robotic Dairy farm is a great place to experience first hand the latest technology available to the Dairy Industry. On our family farm milking happens 24/7 because the cows decide when to visit the robotic milker!*

# “It’s amazing!”

*We are 5th generation dairy farmers and the first in the region to replace our traditional herringbone dairy with a state of the art computer controlled Robotic Dairy.*

*A visit to this dairy farm will connect you to a family with a rich pioneering history and their cows' adoption of automation will amaze you.*

*Tony & Jill Wilson*

*Just 15 minutes north of Kyogle you will find us in the picturesque Upper Richmond Valley at 2019 Summerland Way, The Risk, NSW.*
